COLOUR COMBINATIONS

DIRECTIONS FOR USE

Surface Preparation

Ensure that the surface to be painted is free from loose paint, dust, grease and algae, by vigorous wire brushing, cleaning with water.

Surface Smoothing / Crack Filling

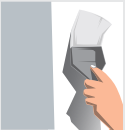

Walls may have slight irregularities and imperfections such as holes, dents and cracks. Asian Paints TruCare Asian Wall Putty is recommended to smoothen the wall surface.

Asian Paints SmartCare Crack Seal can bridge cracks 3mm in width, by filling compound into both interior and exterior masonry surfaces.

Primer Coat

Before application of the topcoat, apply a coat of an exterior durable primer. For fresh surfaces, we recommend Asian Paints SmartCare Primero, specially designed for application on fresh plaster and manufactured sand substrates.

On fully cured plaster surfaces and for re-painting, you can alternatively use Asian Paints TruCare Exterior Wall Primer.

Top Coat

Apply 2-3 coats by diluting 1 litre of Asian Paints Apex Ultima (XU) with maximum 400 ml of water. A gap of 4-6 hours should be given between two coats.

APEX ULTIMA

Asian Paints Apex Ultima with ColourStay™ is a water-based, 100% acrylic, anti algal, high performance exterior wall finish.

Asian Paints Ezypainting Service

Painting your home is exciting. With Asian Paints Ezy Painting service, re-imagine your house as a huge canvas that you can choose to paint and make it look the way you wish.

But choosing the correct colours, products, and painters can be a huge task. That's where we come in with our aim to make painting a great experience!

Our Supervisors will take care of all your wall painting, wood finishing and waterproofing needs.
